# Three Newest Grasses Developed by Research Now in VAUGHAN'S Master Blend® of Merion Formula

## NOW, A MERION LAWN IS NOT ONLY BEST BUT COSTS LESS THAN SECOND BEST

An important change has come in the lawn seed market. A Merion lawn, to which researchers give top rating for beauty, vigor and wear resistance, is now available at less cost for the same area than the finest Kentucky Blue Grass mixtures. One pound of Vaughan's Merion Formula, retailing for \$1.89, will seed an area of 750 to 1,000 sq. ft. It would take 2 to 3 lbs. of a high grade Kentucky Blue Grass mixture at a higher total cost to sow an equal area.

### Merion Grows Sports Turf for Champions.

Turf experts in charge of famous playing fields have learned this by experience. Chicago Cubs' park, the New York Yankees' stadium, Briggs' Stadium in Detroit and athletic fields at Purdue, Notre Dame, Michigan State and West Point are covered with its beautiful, enduring green carpet.

### ADVANTAGES OF A MIXTURE.

Wherever lawns are grown, grass seed mixtures have long been considered more certain than any single variety to produce a good lawn. This is because in any lawn area soil texture, drainage, shade and other factors are rarely uniform. The exact variations cannot be told in advance of sowing, so the practice arose of mixing several grasses, adapted to different conditions, to make sure that at least one of the group would thrive over every inch of the soil surface.

Delta Kentucky Blue Grass, developed by turf researchers in Canada, where seedling vigor and quick early growth are important because of their climate, provides a quick cover for the slower starting Merion.

Pennlawn Creeping Red Fescue, a hybrid developed at the Pennsylvania State University, thrives in sandy soil and shady places, where Merion might grow thinly. Thus a thick green carpet is assured over the entire lawn area, and experience has shown that the beautiful Merion color dominates the lawn.

### VAUGHAN'S MASTER BLEND® OF MERION FORMULA

A great improvement has been made in this Merion mixture. Besides a million seeds of Merion Kentucky Blue Grass, it now contains two other new grasses—developed by scientific research—Delta Kentucky Blue Grass and Pennlawn Creeping Red Fescue.
